Glossary of Accounting, Finance and Economic Terms

Accounting or accountancy is the measurement, processing, and communication of financial information about economic entities such as businesses and corporations. The modern field was established by the Italian mathematician Luca Pacioli in 1494. Accounting, which has been called the "language of business", measures the results of an organization's economic activities and conveys this ...

Selecting Accounting, Marketing, Psychology, and Business

A concept first named by Richard Thaler, mental accounting (or psychological accounting) attempts to describe the process whereby people code, categorize and evaluate economic outcomes. Mental accounting deals with the recollection and perception of our various expenditures; its purpose is to keep track of our money-related decisions so as to give us a model with which to evaluate future ...
