Manifesto for Agile Software Development

By conceiving the project from the beginning as an agile project, you can outsource projects effectively and agilely. This paper describes how one team used Scrum to create an agile RFP, discusses what information should be present in an agile RFP and proposes how to find a partner to trust through a lean, Agile selection process.

Software maintenance in software engineering is the modification of a software product after delivery to correct faults, to improve performance or other attributes. A common perception of maintenance is that it merely involves fixing defects. However, one study indicated that over 80% of maintenance effort is used for non-corrective actions. This perception is perpetuated by users submitting ...
