7- Algal Culturing Introduction ... and are routinely used in the procedure for phytoplankton analysis that require biovolume calculations (Table 6.1). Moreover, software packages for ... ALGAL CULTURE Definition A culture is a genetically homogenous clone propagated from one individual cell or

7- Algal Culturing

Notes 985 ment of a stationary phase, or a maximal algal density, in cell cultures have been pro- posed: the accumulation of waste products

Algal cell size and the maximum density and biomass of

Phytoplankton Culture for Aquaculture Feed ... Table 1: Cell volume, organic weight, and gross lipid content of some commonly cultured phytoplankton species used in bivalve mollusc and fish hatcheries (Helm et al., 2004). Species Median cell ... Phases in the growth of algal cultures. ganic compounds (DOC), dissolved metals, and pesticides. Ce

VI Phytoplankton Culture for Aquaculture Feed

An algal culture shows a carrying capacity due to a self-shading effect. In spite of "unlimited" nutrients, the maximum concentration of algae in a chemostat experiment was measured to be 120 g/m³. At time 0, 0.1 g/m³ of algae was introduced and 2 days after a concentration of 1 g/m³ was observed.
