Oral health surveys: basic methods - 5th edition - Basic oral health surveys provide a sound basis for assessing the current oral health status of a population and its future needs for oral health care. The World Health Organization (WHO) has a long tradition of epidemiological survey methodology, which includes a description of the diagnostic criteria that can be readily understood and ...

In epidemiology, the basic reproduction number (sometimes called basic reproductive ratio, or incorrectly basic reproductive rate, and denoted  $R_0$ ,  $r_0$ ) of an infection can be thought of as the number of cases one case generates on average over the course of its infectious period, in an otherwise uninfected population.. This metric is useful because it helps determine whether or not an ...

Indicator bacteria are types of bacteria used to detect and estimate the level of fecal contamination of water. They are not dangerous to human health but are used to indicate the presence of a health risk. Each gram of human feces contains approximately ~100 billion ( $10^{11}$ ) bacteria. These bacteria may include species of pathogenic bacteria, such as Salmonella or Campylobacter ...

Epidemiology is the branch of medicine that deals with the incidence, distribution, and possible control of diseases and other factors relating to health. Epidemiological studies are challenging for several reasons: MS can be difficult to diagnose. Since there is no single test for MS, the diagnosis can be missed, delayed or even incorrect.
