

bibliometrics informetrics and scientometrics pdf

I'm a senior researcher at the Research Unit for the Sociology of Education (RUSE) at the University of Turku. My research interests include altmetrics, webometrics, bibliometrics, scholarly communication in digital environments, social network analysis, and to study various other phenomena on the web in general and in social media in particular, mainly using quantitative methods.

Kim Holmberg

The h-index is an author-level metric that attempts to measure both the productivity and citation impact of the publications of a scientist or scholar. The index is based on the set of the scientist's most cited papers and the number of citations that they have received in other publications.

h-index - Wikipedia

Citation impact quantifies the citation usage of scholarly works. It is a result of citation analysis or bibliometrics. Among the measures that have emerged from citation analysis are the citation counts for an individual article, an author, and an academic journal.

Among the criticisms raised against this tradition are that human searchers, their interaction with the system, their interpretation of the query, and their process-formed relevance judgments were factors excluded from these experiments.

Library and information science (IEKO)

La bibliométrie peut être définie comme « l'application des mathématiques et des méthodes statistiques aux livres, articles et autres moyens de communication » (Pritchard, 1969 [1]). Une définition plus contemporaine, associant bibliométrie, scientométrie d'outputs et infométrie, serait en termes d'« analyse quantitative de l'activité et des réseaux scientifiques ».
