

brass instruments their history pdf

A brass instrument is a musical instrument that produces sound by sympathetic vibration of air in a tubular resonator in sympathy with the vibration of the player's lips. Brass instruments are also called labrosones, literally meaning "lip-vibrated instruments".. There are several factors involved in producing different pitches on a brass instrument. ...

Brass instrument - Wikipedia

The pitch of a brass instrument is determined by its vibratory length, which determines the fundamental frequency of the open instrument and the frequencies of its overtones. Additional pitches are achieved by varying the length using the instrument's valve, slide, key or crook system. The fundamental frequency is not playable on some brass instruments.
