An icebreaker is a special-purpose ship or boat designed to move and navigate through ice-covered waters, and provide safe waterways for other boats and ships. Although the term usually refers to ice-breaking ships, it may also refer to smaller vessels, such as the icebreaking boats that were once used on the canals of the United Kingdom.. For a ship to be considered an icebreaker, it requires ...

The Arctic is now heading into winter after another record-breaking summer. And there has been no shortage of dramatic headlines. Reports have flooded in of record-breaking warm temperatures in Greenland, both on land and at sea, and near record low summer sea ice. The prospect of an ice free Arctic during the summer now seems inevitable, but when?
