1. Adversity. In 2013, the United States reached an educational milestone. For the first time, a majority of the country’s public school students – 51 percent of them, to be precise – fell below the federal government’s threshold for being low income, meaning they were eligible for a free or subsidized school lunch.

Artificial intelligence (AI), sometimes called machine intelligence, is intelligence demonstrated by machines, in contrast to the natural intelligence displayed by humans and other animals. In computer science AI research is defined as the study of "intelligent agents": any device that perceives its environment and takes actions that maximize its chance of successfully achieving its goals.
