Highest Economic Efficiency Through application of a cathodic corrosion pro-tection system the costs of maintenance for pipe-line networks can be clearly reduced.

Cathodic Corrosion Protection of earthburried Pipelines
WAY AHEAD IN CORROSION CONTROL. To overcome the corrosion problems inherent to a developing energy industry, Deepwater engineers draw from decades of offshore corrosion engineering and design experience.

Stress corrosion cracking (SCC) is the growth of crack formation in a corrosive environment. It can lead to unexpected sudden failure of normally ductile metals subjected to a tensile stress, especially at elevated temperature. SCC is highly chemically specific in that certain alloys are likely to undergo SCC only when exposed to a small number of chemical environments.

SCARBOROUGH, ON, Oct. 31, 2014 /CNW/ â€¢ Automatic Coating Limited, a world leader in applying liquid and powder coating in North America announced today that it fully supports TransCanada 12-Billion Energy East Pipeline Project and is thrilledâ€’

Automatic Coating Corrosion Protection | Automatic Coating
Course Overview: Corrosion is a disease to materials just like a disease to human beings. Some types or forms of corrosion can be prevented through good practices in materials selection and design, while others can be cured or controlled if diagnosed early.

Corrosion Inspection, Corrosion Testing and Monitoring
Cathodic protection (CP) is a technique used to control the corrosion of a metal surface by making it the
cathode of an electrochemical cell. A simple method of protection connects the metal to be protected to a more easily corroded “sacrificial metal” to act as the anode. The sacrificial metal then corrodes instead of the protected metal.
