

diagnostic cytology of the pdf

NOTE: Each specimen/part type must have a separate fully completed requisition. All specimens, requisitions and slides must be labelled. Lack of/or unclear information will result in a delay or failure of processing. PHS Labs are not responsible for unlabelled specimens.

DIAGNOSTIC CYTOLOGY REQUISITION NAME (FIRST)

Fine-needle aspiration (FNA) is a diagnostic procedure used to investigate lumps or masses. In this technique, a thin (23-25 gauge), hollow needle is inserted into the mass for sampling of cells that, after being stained, will be examined under a microscope. The sampling and biopsy considered together are called fine-needle aspiration biopsy (FNAB) or fine-needle aspiration cytology (FNAC ...

The American Cancer Society (ACS), ASCCP, and the American Society for Clinical Pathology (ASCP) have released new guidelines for the prevention and early detection of cervical cancer.

Guidelines - ASCCP

Cytopathology (from Greek *kytos*, "a hollow"; *pathos*, "fate, harm"; and *-logia*) is a branch of pathology that studies and diagnoses diseases on the cellular level. The discipline was founded by George Nicolas Papanicolaou in 1928. Cytopathology is generally used on samples of free cells or tissue fragments, in contrast to histopathology, which studies whole ...
