

diagnostic cytology of the pdf

Fine-needle aspiration (FNA) is a diagnostic procedure used to investigate lumps or masses. In this technique, a thin (23–25 gauge), hollow needle is inserted into the mass for sampling of cells that, after being stained, will be examined under a microscope. The sampling and biopsy considered together are called fine-needle aspiration biopsy (FNAB) or fine-needle aspiration cytology (FNAC ...

Cytopathology (from Greek *kytos*, "a hollow"; *pathos*, "fate, harm"; and *-logia*) is a branch of pathology that studies and diagnoses diseases on the cellular level. The discipline was founded by George Nicolas Papanicolaou in 1928. Cytopathology is generally used on samples of free cells or tissue fragments, in contrast to histopathology, which studies whole ...

January 2017 – Michael Laposata, MD, PhD, has been speaking for years about the need for laboratory consultations and diagnostic management teams, and he will lead the first formal meeting Feb. 7–8 in Galveston, Tex., on what the teams are and how to implement them. Writer Ron Shinkman put a few questions to him about diagnostic management teams and pathology practice.

Diagnostic Strategies in Advanced NSCLC: Guiding Treatment

Whilst HPV tests are less likely to miss cases of CIN 2+ and CIN 3+, these tests do lead to more unnecessary referrals. However, a negative HPV test is more reassuring than a negative cytological test, as the cytological test has a greater chance of being falsely negative, which could lead to delays in receiving the appropriate treatment.

Human papillomavirus (HPV) test compared to the

Start with quality specimen collection to achieve better results. For more than 60 years, BD Life Sciences' Preanalytical Systems has advanced the science of specimen collection to help laboratory tests become the foundation for 70% of all medical decisions. 1 Today, the gold standard in sample collection is the BD Vacutainer® product family, which U.S. hospitals rely on to enhance their ...
