Information technology (IT) is the use of computers to store, retrieve, transmit, and manipulate data, or information, often in the context of a business or other enterprise. IT is considered to be a subset of information and communications technology (ICT).. Humans have been storing, retrieving, manipulating, and communicating information since the Sumerians in Mesopotamia developed writing ...

It would depend far more on the Silicon' construction techniques used by various memory builders. What might be an 'interesting' test would be to see if it only applies to the complete CRAP they sell into the consumer markets or if it applies to the high level quality memory used in top end servers.
