Manual on small earth dams - Food and Agriculture
Irrigation has been a central feature of agriculture for over 5,000 years and is the product of many cultures.
Historically, it was the basis for economies and societies across the globe, from Asia to the Southwestern
United States

Irrigation - Wikipedia
The International Commission on Irrigation and Drainage is dedicated to enhancing the worldwide supply of
food and fibre for all people by improving water and land management and the productivity of irrigated and
drained lands through appropriate management of water, environment and application of irrigation, drainage
and flood management techniques.

Systems of pressurised irrigation, sprinkler or drip, can improve water efficiency and contribute substantially
to improved food production. Sprinkler irrigation is a type of pressurised irrigation that consists of applying
water to the soil surface using mechanical and hydraulic devices that simulate natural rainfall (see Figure 1).

Sprinkler irrigation | ClimateTechWiki
A dairy is a business enterprise established for the harvesting or processing (or both) of animal milk â€“
mostly from cows or goats, but also from buffaloes, sheep, horses, or camels â€“ for human consumption. A
dairy is typically located on a dedicated dairy farm or in a section of a multi-purpose farm (mixed farm) that is
concerned with the harvesting of milk.

are integral and individually distinct parts of programme

Chapter 5. MONITORING AND EVALUATION - UNICEF
This section introduces a range of climate-smart agriculture (CSA) practices and technologies within seven
entry points for CSA; soil management, crop management, water management, livestock management,
forestry, fisheries and aquaculture, and energy management.Practices are understood broadly as ways of
doing things, for example, precision farming, tillage, and fertilization; these are all ...
Practices | Climate-Smart Agriculture Guide
Enabling environments for climate-smart agriculture (CSA) are the framework conditions that facilitate and support the adoption of climate-smart technologies and practices. They include policies, institutional arrangements, stakeholder involvement and gender considerations, infrastructure, insurance schemes, as well as access to weather information and advisory services.
