NI Educational Laboratory Virtual Instrumentation Suite II

In the context of computer programming, instrumentation refers to an ability to monitor or measure the level
of a product's performance, to diagnose errors and to write trace information. Programmers implement
instrumentation in the form of code instructions that monitor specific components in a system (for example,
instructions may output logging information to appear on screen).

Introduction to Corrosion Monitoring What is Corrosion Monitoring? The field of corrosion measurement,

control, and prevention covers a very broad spectrum of tech-

Introduction to Corrosion Monitoring - alspi.com

In music, instrumentation is the particular combination of musical instruments employed in a composition, and the properties of those instruments individually. Instrumentation is sometimes used as a synonym for orchestration. This juxtaposition of the two terms was first made in 1843 by Hector Berlioz in his *Grand traité de l'instrumentation et de l'orchestration modernes*, and various attempts ...
