Pruning Mature Trees Understand the pruning needs of mature trees and the proper pruning techniques for their care. Pruning is the most common tree maintenance procedure.

### **Pruning Mature Trees - TreesAreGood**

Pruning is a horticultural and silvicultural practice involving the selective removal of certain parts of a plant, such as branches, buds, or roots. Reasons to prune plants include deadwood removal, shaping (by controlling or redirecting growth), improving or sustaining health, reducing risk from falling branches, preparing nursery specimens for transplanting, and both harvesting and increasing ...

<sup>1</sup>University of Massachusetts and <sup>2</sup>Rutgers University Deciduous fruit trees have long been a part of the home landscape. The grace of the tree and

### **Simple Rules for Pruning Fruit Trees**

Fruit tree pruning is the cutting and removing of selected parts of a fruit tree. It spans a number of horticultural techniques. Pruning often means cutting branches back, sometimes removing smaller limbs entirely. It may also mean removal of young shoots, buds, and leaves.. Established orchard practice of both organic and nonorganic types typically includes pruning.
