Complexity characterises the behaviour of a system or model whose components interact in multiple ways and follow local rules, meaning there is no reasonable higher instruction to define the various possible interactions.. The term is generally used to characterize something with many parts where those parts interact with each other in multiple ways, culminating in a higher order of emergence ...

Complexity - Wikipedia

Performance management is a management style that has grown increasingly popular. It involves a process in which a company, organization, or institution creates a work environment that empowers employees to work to the best of their abilities. The process that an employer uses to accomplish this often varies from one business to the next.
