

the unified process explained pdf

The Rational Unified Process (RUP) is an iterative software development process framework created by the Rational Software Corporation, a division of IBM since 2003. RUP is not a single concrete prescriptive process, but rather an adaptable process framework, intended to be tailored by the development organizations and software project teams that will select the elements of the process that ...

The Unified Extensible Firmware Interface (UEFI) is a specification that defines a software interface between an operating system and platform firmware. UEFI replaces the Basic Input/Output System firmware interface originally present in all IBM PC-compatible personal computers, with most UEFI firmware implementations providing legacy support for BIOS services.

Effective from 27th May 2017, you can now transfer EPF online using EPF Unified portal. Earlier option of using OTCP (Online Transfer Claim Portal) is no more in use now. Hence, let us understand the process. As I pointed above, earlier there was a separate portal meant for requesting online ...

How to transfer EPF online using EPF Unified portal

Plan and deploy identity-based secure access for BYOD and borderless networks Using Cisco Secure Unified Access Architecture and Cisco Identity Services Engine, you can secure and regain control of borderless networks in a Bring Your Own Device (BYOD) world. This book covers the complete lifecycle of protecting a modern borderless network using these advanced solutions, from planning an ...

Cisco ISE for BYOD and Secure Unified Access, 2nd Edition

I am speaking now from my personal experience. In this respect I had a good training in my youth, as I was a dissident in the early 70s in Bulgaria (see bio in [about the author](#)), which was a repressive communist dictatorship, so that I had to cut all bonds with society. I have preserved this distinct attitude for the rest of my life.
