Clinerion is the worldwide leader in medical data informatics, radically improving efficiency in patient search and identification, increasing effectiveness in clinical research and accelerating the process of drug development to ensure an earlier availability of medicines.

News - Clinerion

Although field value assessment—gathering data firsthand whenever possible—is the most common way to build customer value models, not all situations lend themselves to it.

Business Marketing: Understand What Customers Value

Aberrant drug-related behavior. Aberrant drug-related behavior is a broad term that encompasses behaviors in drug administration that deviate from the prescribed therapeutic plan. However, not all aberrant drug-related behaviors stem from abuse or addiction. A patient may be taking more medication than prescribed to obtain pain relief.

Expanding the Pharmacist's Role in Preventing Opioid Abuse

The documentation required in an NDA is supposed to tell the drug's whole story, including what happened during the clinical tests, what the ingredients of the drug are, the results of the animal ...

51 / Human resources management and capacity development 51.3 United States have some difficulty filling pharmacist posi-tions (FIP 2009). The dynamics of entry and exit from the health workforce in many countries remains poorly understood, and many

chapter 51 Human resources management and capacity development
Quackery, often synonymous with health fraud, is the promotion of fraudulent or ignorant medical practices. A quack is a "fraudulent or ignorant pretender to medical skill" or "a person who pretends, professionally or publicly, to have skill, knowledge, qualification or credentials they do not possess; a charlatan or snake oil salesman". The term quack is a clipped form of the archaic term ...
